Guarantee
Your Access Mid Arbor trout reel is unconditionally guaranteed against defects in materials and workmanship.
If you have any problems, simply send your reel and a $10 check to the following address:
By USPS Mail:
Orvis; Overhaul Services; 178 Conservation Way;
Sunderland, VT 05250.
By FedEx or UPS:
Orvis; Overhaul Services; 4182 Main St.; Manchester,
VT 05240. If the reel is in any way defective in material or workmanship, your $10 repair check will be returned to you at once.
Your reel will be completely serviced (cleaned, lubricated, and returned to you postpaid) for a fee of $10, plus cost of parts.
Damaged reels can be repaired on an individual basis and repair work will be billed at the hourly shop rate, plus parts. We will provide a written estimate upon receipt of the reel prior to any work being done.
Questions?
If you have any questions about the operation and maintenance of your new reel, Orvis Technical Advisors are always available. Email: info@orvis.com. Phone: 1-800-778-4778.

SPOOL REMOVAL
The spool release is located in the middle of the reel body. To remove, depress the spool release latch while simultaneously lifting the spool out of the reel body.

RIGHT-HAND CONVERSION
All Access Mid Arbor reels have the drag system installed for left-hand wind (figure 2). To change your reel to right-hand wind, undo the one-way retainer (part #23) by rotating the retaining tag. Remove one-way bearing (part #24) and flip over. Replace clutch retainer.

ROUTINE MAINTENANCE
Your new Access Mid Arbor reel has been properly lubricated prior to shipping. However, it should be cleaned and lubricated after extensive use or after contact with dirt or sand. Your reel should receive routine cleaning and maintenance at least twice each year. Lightly lubricate all moving components-handle, center spindle, and gear shaft which is available in tackle shops. Do not put the reel away wet, or into a wet reel case or tackle box. For extended storage, remove both line and backing and loosen the drag.

**QUESTIONS?**
If you have any questions about the operation and maintenance of your new reel, Orvis Technical Advisors are always available. Email: info@orvis.com. Phone: 1-800-778-4778.

**DRAG OPERATION**
Access reels feature a dependable center line drag system. To adjust the drag, turn the knob (figure 1) clockwise to increase resistance, and counterclockwise to decrease it. The minimum drag setting should never be less than the pressure required to prevent over-running of the line on fast runs. Additional drag may be applied by palming the spool rim with your fingers or palm. The easy drag adjustment is infinitely variable, providing wide-ranging and controllable settings.

**INTRODUCTION**
With the new fully-sealed drag system of our Access Mid Arbor reel and the benefits of a mid-arbor reel, the Access reel offers maximum line pick up, optimum drag consistency, and superior fish-stopping power.

• Center line drag fully sealed with a carbon and stainless steel surface to fight big fish
• Precision-machined and anodized from 6061 aircraft-grade aluminum
• Heavily ventilated for optimum weight and balance on your fly rod
• Indexed and numbered drag knob for repeatable drag adjustment
• Easily interchangeable spool

**spool REMOVAL**
The spool release is located in the middle of the reel body. To remove, depress the spool release latch while simultaneously lifting the spool out of the reel body.

**RIGHT-HAND CONVERSION**
All Access Mid Arbor reels have the drag system installed for left-hand wind (figure 2). To change your reel to right-hand wind, undo the one-way retainer (part #23) by rotating the retaining tag. Remove one-way bearing (part #24) and flip over. Replace clutch retainer.
